Simple Rail
Wall 565

- 2X 15-7 90° Elbow
- 1X 99-7 Allen Key
- 2X 61-7

- 6X of each 1/4" Wood/Masonry Screws

Pipe

Handrail, Length Varies (1X)
1. Slide one end of the 514-7 Internal Coupling into the socket on the 565-7. Tighten the set screw on the coupling. Perform this action for both rail ends.

2. Insert the other end of the 514-7 coupling into the end of the handrail pipe.

3. Place the flange against mounting surface. Drive 3 screws into fixing holes in the flange. Screws are provided for both masonry and wood surfaces.

4. Tighten each setscrew hand tight using the Allen key. Push and pull on the center of the handrail pipe to check for secure mounting.
