

## Simple Table Instructions - ADJUSTABLE HEIGHT

- 1) Start by attaching the 10-6 Tees to end of Tube A
- 2) Now slide each Tube B through the 10-6 Tees on Tube A
- 3) Attach the remaining 10-6 Tees to the ends of Tube B.
- 4) Slide Tube D into the 10-6 Tees and leave about 75mm sticking out. Tighten setscrews lightly.
- 5) Slide Tube C onto the top of Tube D
- 6) Attach the 61-7 flanges on the top of Tube C
- 7) Place your desktop on the ground, with the bottom facing up.
- 8) Flip the tube frame over so that the 61-7 flanges are now lying flat on the bottom of the desktop. Be careful doing this because the Tubes C will want to come off Tube D when you turn it over.
- 9) Move the legs of the frame on the desktop until the flanges are about 100mm from each edge.
- 10) Attach the 61-7 flanges to the desktop with the appropriate fastener (fasteners not provided).
- 11) Tap the 77-6 plastic plugs into the bottom of Tube D.
- 12) Turn the desk right side up! You are done!

### Tools Needed:

Allen Keys (Included)  
Screw Driver  
Rubber Mallet (for plugs)  
Level  
Frame Parts  
6 x 10-6 Tees  
4 x 61-7 Flanges  
1 x (A) Width Pipe  
2 x (B) Depth Pipes  
4 x (C) External Leg Pipes  
4 x (D) Internal Leg Pipes  
4 x 77-6 Plastic Plugs

### Tips:

Don't over-tighten the setscrews. Tightening a fitting will mark the tube, so be careful where you do it.

You can adjust the individual fittings to make sure that everything is level and square.

### Adjusting the Desk Height

The height of the desk is adjusted by letting more or less of Tube D slip out from Tube C. The 10-6 fittings hold Tube C in place, while letting Tube D through to a certain point.

To adjust the desk, simply loosen the setscrew on the 10-6 fittings on each leg, slide Tube D to the desired height and then retighten the grub screw.

A video on how to build and adjust the desk is here:
