

New from BeamClamp™ BoxSok™

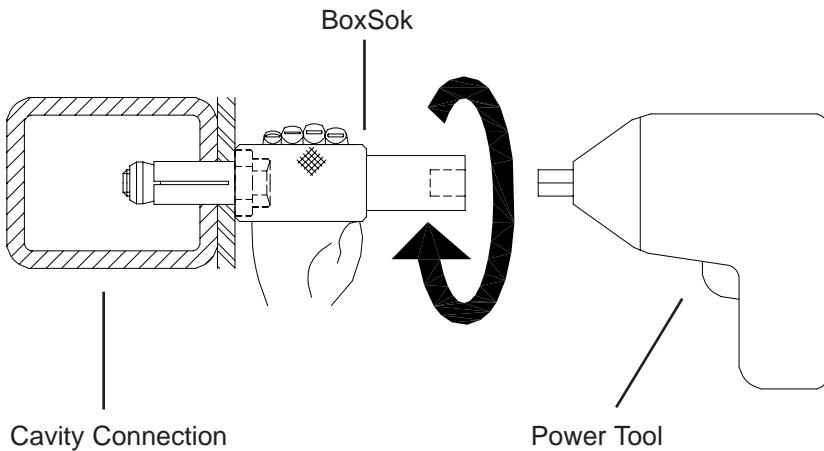

*Install the BeamClamp BoxBolt™
In Seconds*

The BoxSok™

The BoxSok is a unique installation tool for the BoxBolt structural tube expansion anchor. The BoxSok attaches to standard air and power tools and reduces the installation time for the BoxBolt. The BoxBolt can be installed in seconds, saving valuable time and money. This specially designed socket holds the hexagon shoulder of the BoxBolt in place while a second socket tightens the core bolt, pulling the threaded wedge up inside the body to expand the fins.

The BoxSok is available in all five BoxBolt diameters from 5/16" to 3/4" and is driven by a standard 1/2" square drive. Contact Kee Industrial Products for further information.

View showing hex end that grips to the BoxBolt.

The BoxBolt™

*2 views of the BoxBolt, one before installation,
and the other with fins expanded.*

The BoxBolt

The BoxBolt is an expansion anchor for steel that can be used to make connections to rectangular, square or circular structural tube sections.
